Linkedin Github Curriculum Vitae

Objective : software engineering internship ,graduation project

EDUCATION :

2019-2021:
Master's Degree in Software Engineering
Faculty of New Information and
Communication Technologies,
University of Constantine - Algeria
Grade: Class A (rank 1)

2016-2019:
Bachelor's Degree in Software Engineering
Faculty of New Information and Communication Technologies ,
University of Constantine - Algeria
Grade: Class A

Certification :

Cisco
- CCNA 1 Routing and Switching

Coursera
- Google IT Automation with Python Certificat Professionnel
- Continuous Integration
- Introduction to MongoDB
- Web Scraping with Python + BeautifulSoup
- Neural Networks and Deep Learning

OpenClassRooms
- Java and multithreading
- Learn how to code with JavaScript
- Take Back Control with Linux
- Understanding the Web

CIEP :
- DELF B2

SKILLS :

Language :
Java, Java EE, SQL, C/C++, PHP , C# , .net ,python ,bash,octave

Tools :
Eclipse, IntelliJ IDEA, Code::Blocks, MS Project,Visual Studio, PhpMyAdmin, Packet
Tracer, Graphical Network Simulator.

Modelisation :
UML, Merise , Scrum, Unified Process

PROJECTS :

2020-2021 :
graduation project :IT-HERROS: a platform dedicated to predictive maintenance for the operator Djezzy

- Designing and developing platfrom to predict failures and/or breakdowns in a deteriorating system in order to optimize maintenance efforts by assessing the state of the system primarily
- **Skills Used :** ML, python , Scrum,LSTM

2019-2020 :
mini project :Hopital du Futur - Appointment management according to doctors availability (net plateforme, C#)   January 2020

- Designing and developing a component-oriented application for the remote control and monitoring of patients in a hospital facility
- **Skills Used :** C# , .net , Scrum

2019-2020 :
Graduation project :Development of a tour management application for travel agencies (Java J2EE, Flutter)   February 2019

- Designing and developing website and mobile application for travel agencies for management of tourist visits
- **Skills Used :** J2EE , Ajax , JQuery , Flutter ,UP ,MVC2

2019-2020 :
mini project :Development of a web application to manage the registrations of students admitted to the master's programme   January 2019

- Designing and developing website for managing inscription of student in master
- **Skills Used :** J2EE , MVC1

2019-2020 :
mini project :Development of a crossroads simulation application (Java Swing) January 2019

- Developing of desktop application that simulate crossroads
- **Skills Used :** java Swing , multithreading (`Semaphores, Monitors`)

Work Experience :
12/2020-07/2021 Internship :
Creation of website for djezzy

07/2020 FREELANCE :
create website for a client

03/2020 FREELANCE :

create website for a client
